# How to Import the Family History Bookmarks

**Load the Preformatted
Family History Bookmarks**

You should download the bookmark file from the **www.familyhistoryisfun.com** website and unzip it before we begin.

1. Launch Firefox and from the Import and Backup menu, select "Import HTML…"

2. Select "From an HTML File".

3. Click "Next".

4. Select your location of the downloaded bookmark file (probably in your Downloads folder).

5. Select "Family History Bookmarks".

6. Click "Open".

7. Arrange the imported bookmarks how you would like them to be.

8. Close the Bookmarks window by clicking the "Close" button.

The "Family History Bookmarks" are now installed on your Firefox Internet Browser — and you're ready for some exciting family history action!
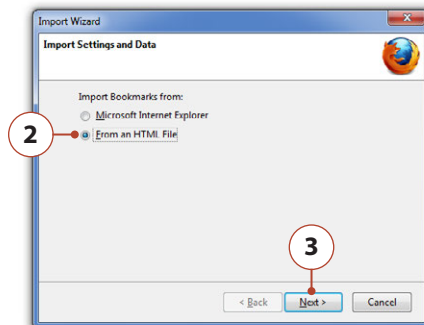

Please Read: *These instructions were prepared for installing the Family History Bookmarks on* **Mozilla Firefox 4.0 on a computer running Windows 7.**

If you are installing Firefox on a computer running a different version of Windows or on a Mac, there will be some differences, but it should be similar to what is pictured here.
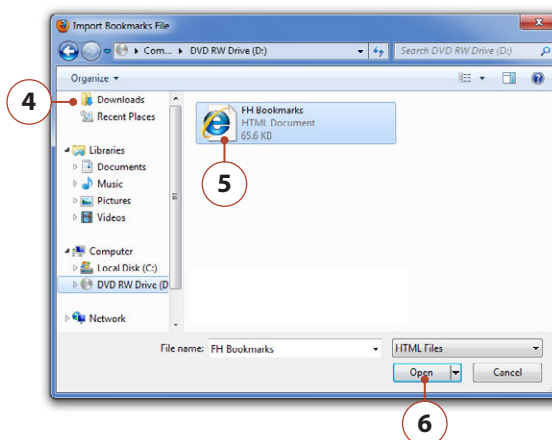

You can follow these same basic steps if you're installing them on Google Chrome, Internet Explorer, or Safari instead.
